*On- and off-line sales with a single software !*

Optimal ERP : POS software for Small & Medium Enterprises

Advantages :

- Multi-POS, multi-platforms (Windows, Mac, Unix)
- Requires minimal hardware setup (no expensive network)
- Integrates orders from an online shop
- Real-time stock information (also on web site)
- Mobile data input through Palm-like devices
- Follow-up your business development from anywhere !

Features :

- client orders (offers, cash-till sales, orders, refunds, …)
- deliveries (scheduler, boxes follow-up, returned items, …)
- stocks (multi-stocks, minimal quantities, …)
- production (production sheets, raw material, manpower, …)
- producer orders (direct input, …)
- follow-up (articles disruption, ready orders, cash-till journals, …)
- accounts (export to accounting software of your choice)
- data export to Word and Excel (mailings, stats, …)

Internet sales :

We can propose you standard or custom e-shops that are totally integrated with the software.

Payments through credit/debit cards are handled through secured payment systems like **yellowpay** from our official partner, PostFinance.

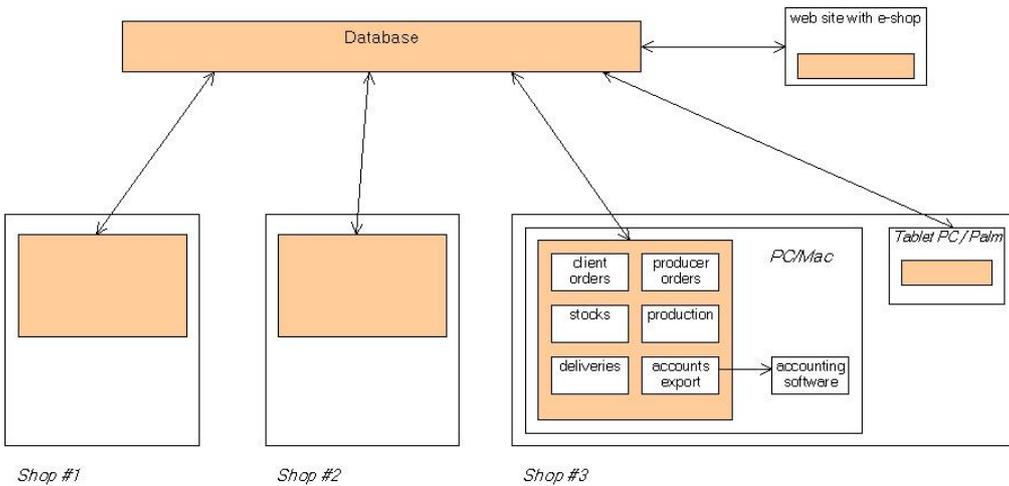

Experience :

We'll be happy to advise you on the best equipment to match your needs : barcode readers, ticket printers, label printers, …

On- and off-line sales with a single software !

# Optimal ERP : POS software for Small & Medium Enterprises

Architecture :

Optimal ERP draws much of its power from a web-centered architecture capable of sharing the same data between various shops and locations. One can also connect to it from a mobile device like a Tablet PC or a wireless Palm.
.

« Plug-and-play » e-shop!

You would like to sell your products through Internet but get discouraged by the amount of work to achieve that ? We have ready-to-use e-shops that directly integrate data from Optimal ERP (articles, categories, qties in stock, boxes per article, …)

Thus, once the web site adapted to your colours and logo, you'll be able to accept Internet orders that will then be handled by Optimal ERP as if they had been passed in one of your shops !

PC, Mac, Linux ? That's your choice !

Optimal ERP stands above all these platform considerations. Whether you are using Windows, Mac, Linux or a mixture of those, it will work perfectly without any special handling and with your preferred look and feel (Aqua, Windows, …).

And as the source code for all these platforms is unique, we guarantee them the same evolution over time.
